- Installation of temporary partition between works and main building. Decorated to meet building colours allowing classes to continue at normal
- Dedicated on site Foreman available to liaise daily with nursery and school staff
- Our Foreman dressed as Father Christmas for pupils during festive celebrations adding community value

## Contract details

Located in Plymstock, Plymouth, Pomphlett Primary School is a local community school providing education to around 200 pupils aged four to eleven. The School Site comprises of a number of one and two storey buildings, a playground as well as a private nursery.

Ian Williams carried out an extension project at the school to create a new classroom and extend the existing drama studio. Works included;

- Demolition of existing changing room, excavation and underpinning
- Construction of cavity walls and a new roof
- Mechanical and electrical works
- New flooring and decorations
- Installation of electric bi-fold door

Our experience of working on live, educational sites ensured minimal disruption to the School and Nursery. For example, we carefully programmed works around school timings and holidays, carrying out noisy works after school or during holidays. We also installed a temporary partition which we decorated to match the school's colours enabling lessons to continue as normal.

Throughout the project we used a direct delivery local team. This included an on-site Foreman who was available to liaise with both nursery and school staff on a daily basis. Our Foreman added community value to this project by volunteering to dress up as Father Christmas during the School's festive celebrations.
